Re: Application for Business Analyst – Internal Communications

Dear Hiring Manager,

I am excited to apply for the Business Analyst – Internal Communications role at [Company Name], where I can leverage my expertise in data analysis, Power BI, and stakeholder engagement to drive business outcomes through communications analytics. With a strong background in connecting IT, Finance, and Operations stakeholders, I am confident that I can help your team generate insights from complex operational and financial data.

In my current role as Business Analyst at Brock Canada, I have developed an executive Power BI reporting ecosystem used by 50+ senior leaders to monitor project KPIs. I also designed and maintained Power BI data models combining labour, cost, productivity, contract, progress, and SAP B1 data, improving the reliability of operational and financial reporting. Additionally, I built a predictive lump-sum project tracking web application to forecast overrun risk and help project managers make proactive decisions.

I am particularly drawn to this role because it requires a strong understanding of corporate communications and digital communications channels, as well as experience interpreting communications performance metrics and campaign analytics. As someone with a proven track record in business analysis, stakeholder engagement, and data-informed decision making, I believe that I would be an excellent fit for your team. I look forward to discussing my qualifications further.

Sincerely,
Shrey Modi
