

Shrey Modi

Business Analyst | Communications & Operations Analytics | Data Analyst

Toronto, Canada (Open to Relocation) | +1 (905) 783-9118 | shreymodi0711@gmail.com | linkedin.com/in/shreymodi786

Professional Summary

Results-driven Business Analyst with 2+ years of experience in analytics, stakeholder engagement, and communications. Proven ability to generate insights from complex data, drive business-friendly reporting, and support continuous improvement initiatives. Skilled in Power BI, DAX, and SQL, with expertise in connecting IT, Finance, and Operations stakeholders through data-informed decision making.

Core Competencies

Stakeholder & Consulting: Stakeholder Engagement, Cross-Functional Collaboration, Requirements Gathering & Documentation, Communication & Relationship Building

Insight & Reporting: Insight Generation & Storytelling, Translating Complex Data into Business-Friendly Insights, Executive Presentations & Reporting

Ways of Working: Analytical & Problem-Solving Mindset, Proactive & Outcome-Oriented Approach, Continuous Process Improvement

Core Skills

Power BI & Data Modeling: Power BI, DAX, SQL Server, dashboard design, report automation, communications analytics, insight generation

Forecasting & Analytics: campaign analytics, communications performance metrics

Data Engineering & Quality: data cleansing, data validation, master data management, structured datasets

Business Partnership: IT-Finance-Operations collaboration, requirements gathering, stakeholder communication, UAT, process improvement, corporate communications

Tools & Cloud: dashboards, reporting tools

Professional Experience

Business Analyst | Brock Canada - Nisku, AB

Feb 2025 – May 2026

- Developed an executive Power BI reporting ecosystem used by 50+ senior leaders to monitor project KPIs, burn rate, labour productivity, financial performance, and operational trends across multiple company entities.
- Designed and maintained Power BI data models combining labour, cost, productivity, contract, progress, and SAP B1 data, improving the reliability of operational and financial reporting.
- Built a predictive lump-sum project tracking web application to forecast overrun risk, identify early warning signals, and help project managers make proactive cost and schedule decisions.
- Translated operational performance into financial impact through budget variance analysis, EAC forecasting, CPI/PF productivity metrics, burn-rate reporting, and scenario-based project controls insights.
- Automated SQL-based reporting workflows using SAP B1 data, reducing manual reporting effort by 5-10 hours per week while improving data consistency and auditability.
- Created Power Apps solutions for timesheet entry, labour tracking, and progress tracking, reducing manual data-entry errors and improving field-to-office reporting accuracy by 20%.
- Partnered with project managers, Finance, and Operations teams to clarify requirements, validate data quality, reconcile costs, and deliver clear recommendations to management.
- Received the Most Valuable Team Player Award for collaboration, ownership, initiative, and measurable business impact through analytics and automation.

Data Analyst | Red Wireless - Saskatoon, SK

Nov 2024 – Dec 2024

- Built and automated interactive KPI dashboards for marketing and operations teams, improving visibility into customer behavior, campaign performance, and commercial trends.
- Performed data cleansing, transformation, and validation using SQL and Python to ensure accurate customer, campaign, and operational datasets for stakeholder reporting.
- Delivered analytical reports that influenced marketing campaign optimization and contributed to a 10% improvement

- in customer retention.
- Integrated third-party APIs with Google Sheets using JavaScript, eliminating manual extraction and accelerating analytical turnaround for recurring reporting.

MLOps Engineer Intern | Vosyn - Etobicoke, ON May 2024 – Oct 2024

- Worked in Agile/Scrum cycles to improve CI/CD pipelines, automating Docker builds through GitHub Actions and reducing build times by 40% and deployment errors by 30%.
- Provisioned AWS infrastructure including Lambda, EC2, S3, ECR, and ECS to support scalable data-processing workloads with a 99.9% uptime target.
- Optimized Python data-processing scripts, achieving 50% faster throughput and 25% lower latency for analytical workloads.

Projects

Mental Health Apprehension Analytics | AI and Data Analyst Project - Toronto Public Data (Aug 2024)

- Built an end-to-end ETL and analytics pipeline on AWS/HDFS to ingest, clean, process, and analyze Toronto Police public datasets at scale.
- Developed a forecasting model to predict apprehension locations and visualized insights in a Streamlit web application for stakeholder presentation.

JupyterHub Sandbox Administration System | Cloud/Data Platform Project - Georgian College (Aug 2023)

- Deployed and administered a multi-user JupyterHub environment, enabling scheduled access to CPU/GPU resources for analytics and data science workloads.

Education

Post-Graduate Certificate in Big Data Analytics Georgian College, Barrie, ON 4.00 GPA Dean’s List	Jan 2024 – Aug 2024
Post-Graduate Certificate in Artificial Intelligence Georgian College, Barrie, ON 4.00 GPA Dean’s List	Jan 2023 – Aug 2023
Bachelor of Computer Engineering KSV University, Gandhinagar, Gujarat, India 3.7 GPA	Jun 2018 – Jun 2022

Certifications & Recognition

Certifications: Microsoft Azure Data Fundamentals (DP-900); Azure Machine Learning; AWS Academy Machine Learning for NLP; AWS Academy Cloud Architecting; Advanced Power BI: DAX Language, Formulas, and Calculations; Stanford Supervised Machine Learning.

Awards: Most Valuable Team Player Award - Brock Canada; Dean’s List - Big Data Analytics; Dean’s List - Artificial Intelligence.
