Re: Application for Business Intelligence Analyst

Dear Hiring Manager,

I am excited to apply for the Business Intelligence Analyst role at SASCU Credit Union, where I can leverage my expertise in Power BI and data analysis to drive business insights and decision-making. With over two years of experience in developing executive reporting ecosystems and predictive analytics applications, I am confident that I can make a significant impact at your organization.

In my previous roles, I have consistently demonstrated my ability to deliver high-impact analytics solutions that improve operational efficiency, reporting capabilities, and cross-functional collaboration. For example, at Brock Canada, I developed an executive Power BI reporting ecosystem used by 50+ senior leaders, reducing manual reporting effort by 10% and enabling real-time visibility into project KPIs, financial performance, labour productivity, and operational trends. Additionally, I have experience with data modeling, forecasting, and automated KPI reporting using tools like DAX, Power Query (M), and SQL.

I am particularly drawn to this role at SASCU Credit Union because of the opportunity to work in a regulated environment where my analytical skills can be applied to drive business insights and decision-making. I am confident that my experience with data analysis, visualization, and communication will enable me to make a significant contribution to your team's success.

Sincerely,
Shrey Modi
