Electronic Arts

Re: Application for Advanced Analyst at Electronic Arts

Dear Hiring Manager,

I am excited to apply for the Advanced Analyst role at Electronic Arts, where I can leverage my expertise in Power BI, DAX, and SQL to drive business growth through data-driven insights. With over two years of experience as a Data Analyst and Power BI specialist, I have developed a strong background in building predictive tools for high-volume operational environments and executive-ready reporting ecosystems.

In my previous role at Brock Canada, I successfully designed and maintained Power BI data models integrating SAP B1, labour, cost, contract, productivity, and progress data. This integration improved reporting accuracy by 30% and established a single source of truth for business decision-making. Additionally, I built a predictive project analytics application that forecasted lump-sum project overruns and identified early risk indicators, improving forecast accuracy and supporting proactive cost-control decisions.

I am confident in my ability to deliver high-impact analytics and automation initiatives that improve operational efficiency, reporting capabilities, and cross-functional collaboration. As an experienced Data Analyst with a strong background in Power BI and data modeling, I am excited about the opportunity to join Electronic Arts' Battlefield Analytics team and contribute to driving business growth through data-driven insights.

Sincerely,
Shrey Modi
