

Shrey Modi

IT Financial Analyst | Data Analytics & Reporting Expert

Toronto, Canada (Open to Relocation) | +1 (905) 783-9118 | shreymodi0711@gmail.com | linkedin.com/in/shreymodi786

Professional Summary

Results-driven IT Financial Analyst and data analytics specialist with 2+ years of professional experience in financial analysis, budgeting, forecasting, procurement coordination, and working with enterprise financial systems. Proven expertise in connecting finance, operations, and IT stakeholders through clear management insights, reliable semantic models, and proactive decision support. Strong background building predictive tools for high-volume operational environments and executive-ready reporting ecosystems.

Core Competencies

Stakeholder & Business Partnership: Stakeholder Engagement & Management, Requirements Gathering & Documentation, Cross-Functional Collaboration (IT-Finance-Operations), Workshop Facilitation & Interviews, Communication & Relationship Building

Insight & Decision Support: Data Storytelling & Insight Generation, Translating Complex Data into Business Recommendations, Executive Presentations & Reporting, Decision Support & Trade-off Analysis

Ways of Working: Analytical & Problem-Solving Mindset, Agile & Iterative Delivery, Continuous Process Improvement, Ownership & Outcome-Oriented Approach, Attention to Detail & Data Quality Focus, Organization, Time Management, Analytical Thinking

Communication & Collaboration: Communication (oral and written), Multitasking skills, Mathematical skills

Core Skills

Business Analysis: Requirements Gathering, Functional Documentation, Process Mapping & Gap Analysis, User Stories & Use Cases, UAT Planning & Execution, Process Improvement, KPI Definition & Governance

BI & Reporting: Power BI, DAX, Power Query (M), Semantic / Data Modeling, Dashboard Design, Report Automation, Excel (Advanced, VBA), Executive Reporting

Data Analysis & Statistics: SQL (SQL Server), Python (Pandas, NumPy), Exploratory Data Analysis, Trend & Variance Analysis, A/B-style Comparative Analysis, Scenario Modeling, Budget & EAC Forecasting, Budgeting, Financial analysis

Machine Learning & Forecasting: Predictive Modeling, Supervised Learning (Regression, Classification), Time-Series & Demand Forecasting, Model Evaluation & Validation, Streamlit (ML App Deployment), Forecasting

Data Engineering & Platforms: ETL Pipelines, Data Cleansing & Validation, Master Data Management, SAP Business One (ERP), SharePoint, Power Apps, Azure (Fabric, DP-900), AWS (S3, Lambda, EC2), Git/GitHub, Docker

Financial Analysis & Planning: PeopleSoft Finance, Microsoft Copilot, AI-enabled tools, Data analytics, Reporting tools, Automation, Excel functions, Reporting dashboards

Professional Experience

Business Analyst | Brock Canada - Nisku, AB

Feb 2025 – May 2026

- Developed an executive Power BI reporting ecosystem used by 50+ senior leaders, reducing manual reporting effort by 10% and enabling real-time visibility into project KPIs, financial performance, labour productivity, and operational trends.
- Designed and maintained Power BI data models integrating SAP B1, labour, cost, contract, productivity, and progress data, improving reporting accuracy by 30% and establishing a single source of truth for business decision-making.
- Built a predictive project analytics application that forecasted lump-sum project overruns and identified early risk indicators, improving forecast accuracy and supporting proactive cost-control decisions.
- Performed budget variance analysis, EAC forecasting, burn-rate monitoring, and productivity analysis (CPI/PF), enabling project teams to identify performance risks earlier and improve forecast reliability.
- Automated SQL-based reporting workflows and SAP B1 data extraction processes, reducing reporting turnaround time by 15% and saving 5-10 hours of manual effort per week.
- Developed Power Apps solutions for timesheet entry, labour tracking, and progress reporting, reducing data-entry errors by 20% and improving field-to-office reporting efficiency.
- Collaborated with Finance, Operations, and Project Management stakeholders to gather requirements, validate data

- quality, and deliver analytics solutions that improved reporting adoption and decision-making effectiveness.
- Received the Most Valuable Team Player Award for delivering high-impact analytics and automation initiatives that improved operational efficiency, reporting capabilities, and cross-functional collaboration.

Data Analyst | Red Wireless - Saskatoon, SK

Nov 2024 – Dec 2024

- Built and automated interactive KPI dashboards for marketing and operations teams, reducing manual reporting effort by 50% and improving visibility into customer behavior, campaign performance, and commercial trends.
- Performed data cleansing, transformation, and validation using SQL and Python, improving data accuracy by 25% and ensuring reliable datasets for stakeholder reporting and analysis.
- Delivered analytical insights and performance reports that supported marketing campaign optimization, contributing to a 10% improvement in customer retention and stronger customer engagement.
- Integrated third-party APIs with Google Sheets using JavaScript, eliminating manual data extraction, reducing reporting turnaround time by 80%, and enabling near real-time access to business metrics.

MLOps Engineer Intern | Vosyn - Etobicoke, ON

May 2024 – Oct 2024

- Enhanced CI/CD pipelines using GitHub Actions and Docker, reducing build times by 40% and deployment failures by 30%, improving reliability of data and machine learning workflows.
- Provisioned AWS infrastructure including Lambda, EC2, S3, ECR, and ECS to support scalable data-processing and machine learning workloads with a 99.9% uptime target.
- Optimized Python-based data-processing pipelines, increasing throughput by 50% and reducing latency by 25%, enabling faster analytics and model development.

Projects

Mental Health Apprehension Analytics | AI and Data Analyst Project - Toronto Public Data

Aug 2024

- Built an end-to-end ETL and analytics pipeline on AWS/HDFS to ingest, clean, process, and analyze Toronto Police public datasets at scale, reducing manual preprocessing effort by ~60% and enabling scalable data exploration.
- Developed a forecasting model to predict apprehension locations and behavior patterns, improving predictive insight accuracy and delivering results via a Streamlit web application for stakeholder interpretation and decision-making support.
- Designed and implemented interactive visual analytics dashboards to surface spatial and temporal crime trends, improving data accessibility for non-technical stakeholders.

JupyterHub Sandbox Administration System | Cloud/Data Platform Project - Georgian College

Aug 2023

- Deployed and administered a multi-user JupyterHub environment enabling scheduled CPU/GPU access for analytics and data science workloads, improving resource utilization efficiency.
- Configured secure, role-based access and environment isolation for users, enhancing system stability and reducing environment setup time for data science workflows.

Education

Post-Graduate Certificate in Big Data Analytics

Jan 2024 – Aug 2024

Georgian College, Barrie, ON | 4.00 GPA | Dean's List

Post-Graduate Certificate in Artificial Intelligence

Jan 2023 – Aug 2023

Georgian College, Barrie, ON | 4.00 GPA | Dean's List

Bachelor of Computer Engineering

Jun 2018 – Jun 2022

KSV University, Gandhinagar, Gujarat, India | 3.7 GPA

Certifications & Recognition

Certifications

- Microsoft Azure Data Fundamentals (DP-900)
- Azure Machine Learning
- AWS Academy Machine Learning for NLP
- AWS Academy Cloud Architecting
- Advanced Power BI: DAX Language, Formulas, and Calculations
- Stanford Supervised Machine Learning

Awards

- Most Valuable Team Player Award - Brock Canada
- Dean's List - Big Data Analytics
- Dean's List - Artificial Intelligence
