Dear Hiring Manager,

I am excited to apply for the Business Analyst role at [Company Name], where I can leverage my expertise in Power BI, data modeling, and stakeholder engagement to drive business insights and process improvements. With over two years of experience as a Data Analyst and Power BI specialist, I have developed a strong background in connecting IT, Finance, and Operations stakeholders through clear management insights and reliable semantic models.

In my previous role at Brock Canada, I successfully designed and maintained an executive Power BI reporting ecosystem used by 50+ senior leaders to monitor project KPIs. I also built predictive lump-sum project tracking web applications to forecast overrun risk and identify early warning signals. My experience with data warehousing and reporting concepts, SQL skills, and Microsoft Office (Excel, Word, PowerPoint) will enable me to make a seamless transition into this Business Analyst role.

I am confident that my strong background in building predictive tools for high-volume operational environments and executive-ready reporting ecosystems aligns well with the requirements of this position. I look forward to discussing how my skills and experience can contribute to the success of [Company Name].

Sincerely,
Shrey Modi
