Oniryx

Re: Application for Functional - Business Analyst at Oniryx

Dear Hiring Manager,

I am excited to apply for the Business Analyst role at Oniryx, where I can leverage my experience in developing executive reporting ecosystems and collaborating with cross-functional teams to drive business insights.

In my previous role as a Business Analyst at Brock Canada, I developed an executive Power BI reporting ecosystem that improved data reliability and reduced manual reporting effort by 5-10 hours per week. Additionally, I built predictive lump-sum project tracking web applications using Python and Power Apps solutions for timesheet entry and labour tracking, which resulted in a 20% improvement in field-to-office reporting accuracy.

I am confident that my skills in data modeling, forecasting, and automated KPI reporting align with the job requirements. My experience in building predictive tools for high-volume operational environments and executive-ready reporting ecosystems will enable me to make a significant impact at Oniryx.

Sincerely,
Shrey Modi
