PCL Constructors Inc.

Re: Application for Business Systems Analyst at PCL Constructors Inc.

Dear Hiring Manager,

I am excited to apply for the Business Systems Analyst role at PCL Constructors Inc., where I can leverage my expertise in Power BI, DAX, SQL, and Python to drive business insights and process improvements. With over two years of experience as a Data Analyst and Power BI specialist, I have developed a strong background in connecting IT, Finance, and Operations stakeholders through data-driven storytelling and analytics.

In my previous role at Brock Canada, I successfully designed and maintained an executive Power BI reporting ecosystem that integrated SAP B1, labour, cost, contract, productivity, and progress data. This solution improved reporting accuracy by 30% and established a single source of truth for business decision-making. Additionally, I built a predictive project analytics application that forecasted lump-sum project overruns and identified early risk indicators, improving forecast accuracy and supporting proactive cost-control decisions.

I am confident that my skills in data engineering, quality, and partnership will enable me to make a significant impact at PCL Constructors Inc. As a seasoned Business Analyst with experience in Power Apps development, I can automate reporting workflows and extract SAP B1 data efficiently. My background in stakeholder communication and collaboration will also facilitate seamless integration with cross-functional teams.

I am eager to discuss how my expertise can support the business objectives of PCL Constructors Inc. and contribute to the success of your team.

Sincerely,
Shrey Modi
