PCL Constructors Inc.

Re: Application for Procurement Data Analyst at PCL Constructors Inc.

Dear Hiring Manager,

I am excited to apply for the Procurement Data Analyst role at PCL Constructors Inc., where I can leverage my expertise in Power BI, data modeling, and business analytics to drive procurement operations efficiency and decision-making. With a strong background in connecting IT, Finance, and Operations stakeholders through data-driven insights, I believe I would be an excellent fit for this position.

In my previous role as a Business Analyst at Brock Canada, I developed an executive Power BI reporting ecosystem that reduced manual reporting effort by 10% and enabled real-time visibility into project KPIs. I also built predictive project analytics applications that forecasted lump-sum project overruns and identified early risk indicators, improving forecast accuracy and supporting proactive cost-control decisions. These accomplishments demonstrate my ability to analyze complex operational and financial data, identify key trends, and develop actionable insights for business stakeholders.

As a seasoned Power BI expert with experience in designing and maintaining large-scale data models, I am confident in my ability to extract valuable insights from procurement data and present them in an easily digestible format. My proficiency in SQL, Python, and data engineering tools will enable me to efficiently process and analyze large datasets, ensuring timely delivery of high-quality reports and dashboards that meet the needs of district purchasing teams.

Sincerely,
Shrey Modi
