Primus Workforce Ltd.

Re: Application for Data Management at Primus Workforce Ltd.

Dear Hiring Manager,

I am excited to apply for the Data Management Specialist role at Primus Workforce Ltd., where I can leverage my expertise in data analysis, Power BI, and stakeholder collaboration to drive business insights and optimize operational efficiency.

With over two years of experience as a Business Analyst at Brock Canada, I have developed and maintained complex Power BI data models integrating SAP B1, labour, cost, contract, productivity, and progress data. These models improved reporting accuracy by 30% and established a single source of truth for business decision-making. Additionally, I built predictive project analytics applications that forecasted lump-sum project overruns and identified early risk indicators, improving forecast accuracy and supporting proactive cost-control decisions.

As a Data Analyst at Red Wireless, I performed data cleansing, transformation, and validation using SQL and Python, improving data accuracy by 25%. I also delivered analytical insights and performance reports that supported marketing campaign optimization, contributing to a 10% improvement in customer retention and stronger customer engagement. My experience with Power BI, DAX, and Power Query (M) enables me to create interactive dashboards and automate reporting workflows, reducing manual effort and improving stakeholder visibility.

I am confident that my technical skills, combined with my ability to collaborate with stakeholders and drive business outcomes, make me an ideal candidate for the Data Management Specialist role at Primus Workforce Ltd. I look forward to discussing how my expertise can support your team's goals and objectives.

Sincerely,
Shrey Modi
